Preparing Your Schedule for Data Entry

BEFORE YOU BEGIN: - Go to settings on your watch and set “**Screen Timeout**” to the maximum of **60 seconds** (just for data entry)

The app needs to be open and running while you enter the data on your phone.

BASIC SETUP

It is possible to complete a basic setup without prior preparation, simply by having a copy of your schedule with you.

However, for advanced setup, it is best to prepare by preparing some selections such as period times, names, breaks etc.

FOR ADVANCED USERS, SKIP TO “Advanced Setup - Preparation” on p5, BEFORE COMPLETING ANY DETAILS

These steps outline the fastest and simplest way to setup a basic timetable/schedule.

STEP 1. – Start Date

You need to enter a date NO LATER THAN THE CURRENT DATE.

i.e. You cannot enter a future date.

The simplest solution is to set a date 1 or more full-cycles earlier than your intended first day of classes.

e.g. For a 5-day cycle, starting this coming Monday, set the date for the previous Monday, or for the Monday before that, if using a 10-day cycle. **FORMAT: yyyy,mm,dd**

STEP 2. – Cycle

If using a 10 day cycle, you do not need to do anything here.

Selecting the 5-day cycle option, will allow you to enter data for 1 week only.

STEP 3. – Number of periods

There are 16 periods by default, numbered 1 to 16.

For a basic setup, select how many of these you wish to display

(Advanced setup allows you to set codes and tailor the slots To your needs. e.g. To show breaks, before school etc)

STEP 4. – Highlight Current Period?

For a basic setup, turn off this option. Then Hide period times

STEP 5. – Hide period Times

For the most basic setup, select to hide the period times.

STEP 6. – Time Format

You can elect to change the display to 12 or 24 hour format.

Simulator View of settings on phone.

Section 1 - Basic Setup

Only change items you need

HINT: Change times, period and break names, locations and more, in sections 2 and 3

Enter Start Date (default 30 Sep 2020) >

5/10 day cycle (default 10) >

No. of Pds (timeslots) to display (default 16)

Highlight Current Period (default ON) >

Show/Hide Period Times (default SHOW) >

Time Format >

Enter UP TO 10 subjects and their schedules

Default subject names are Subject 1, etc

Subject setup follows on next page.

Entering class names, schedules, and regular locations

In this basic setup section, you can easily add up to 10 subjects/items, their schedules, and their locations (assuming each subject is always in the same location. Individual cases can be overwritten in advanced setup)

STEP 7. – Enter subjects

Repeat the following steps for up to 10 subjects/items.
For extra items, and more customisation, see the advanced settings section.

Change Subject Name.

Enter up to 10 characters for each subject name.

Enter Subject Schedule

The schedule for each subject is easily entered by following the simple example below:

1,4,2,6,4,1

Means day1, period 4, day 2, period 6, day 4 period 1.
Enter all instances for each subject.

Enter Subject Location (optional)

Do not enter anything if not required.

Enter up to 4 characters, with maximum of 1 uppercase.
This room/location will be assigned to all instances of that Subject.

NOTES:

- If you exceed subject name or location character limits, they will be truncated and displayed with an ellipsis.
e.g. revolutiona...

Simulator View of settings on phone.

You can also see parts of the sample data entered.

Enter UP TO 10 subjects and their schedules

Default subject names are Subject 1, etc

Change Subject 1 Name Science >

Item1: Enter Subject 1 schedule 1,4 >

Enter Subject 1 Location (optional) F125 >

Change Subject 2 Name Language >

Item2: Enter Subject 2 schedule 1,5,2,6,3,7 >

Enter Subject 2 Location (optional) >

Change Subject 3 Name >

Item numbers allow error messages to direct you to the data that requires correcting.

11:32 Sun, Oct 18 - Day --

ERROR -

Please ensure all data is entered correctly in settings.

Check Schedule Values for item 1

Optional & Advanced Setup

Optional Settings

Renaming days of the schedule

By default, the 10 days are named A1, A2, A3, A4, A5 and B1, B2, B3, B4, B5

If you selected a 5-day schedule in Basic Setup, only A1, A2, A3, A4, A5 apply.

Type in 5 or 10 new names/numbers, if desired.

Maximum of 2 characters each.

Change main "Type 1" period names

Up to 16 names for the 16 slots.

Change "Type 2" period names

These are the codes that show for days you elect to follow the type 2 period times.

Change how many "Type 2" periods

Change "Type 2" period names

Drop-down list - Tick the days that follow type 2 times

Advanced Settings

Change main "Type 1" period Times

1 for each of the number of slots elected for display (up to 16 slots). 24h format, separated by commas.

e.g. 09:00,09:50,10:20,12:00,13:20 etc

Change "Type 2" period names

As above, but for the Type 2 days.

Section 2 - OPTIONAL Settings

Separate entries with commas and **NO EXTRA SPACES**

Day Name defaults **A1 to A5 (+ B1 to B5 if 10 day)**

Change Day Names >

You can set **2 types of days**, to cater for different period names and times

Change Type 1 Period Names >

Change Type 2 Period Names: >

No. of Type 2 Pds to display (default 11) >

Select days that follow Type 2 Periods >

Section 3 - ADVANCED Settings

**** **WARNING** ****

These time settings will determine current period.

Must be correct times and formats to work

Change Type 1 Period Time slots >

Change Type 2 Period Time slots >

Recurring/Daily Items

Up to 8 items can be instantly set to appear at the same time

on: 1. All days, 2. Type 1 days only, 3. Type 2 days only

NOTE: Use whichever of the 8 you desire – in any order

Change Item names

You can leave the default names “Recess etc”, or rename.

Select days and periods for the item

In the drop-down list, you MUST select option 1 2 or 3, to indicate which days the item applies to.

Then tick the period, or periods that it will be applied to.

Extra Rooms/Locations

This is a convenient way of naming and scheduling particular rooms, not already scheduled with classes.

Enter each room/location name

Enter the schedule for each location.

e.g. 3,4,6,2 means that location is used day3, period4 and day 6, period 2, etc

Extra Subjects

These settings allow extra subjects/items, if required.

However, locations need to be set in the previous section

Enter each extra subject/item name

Enter the schedule for each extra item.

e.g. 3,4,6,2 means that item occurs day3, period4 and day 6, period 2, etc

Custom Items

Up to 5 custom items can be set – as one-off items.

Enter the details for each custom item

e.g. Band Pract,4,7,hall

will assign the item “Band Pract” to day 4, slot 7, in the location “hall”

Repeating DAILY ITEMS e.g. Breaks, Homeroom

Can apply to type 1, 2, or all days

Leave blank if not required.

Daily Item 1 Name >

Daily Item 1 Days and timeslots >

Daily Item 2 Name >

Extra Room/Location Settings

Enter Room/Location 11 Name >

Item11: schedule for Room/Location 11 >

Enter Room/Location 12 Name >

Extra Subjects

Enter extra Subject 1 Name >

Item21: schedule for extra Subj 1 >

Enter extra Subject 2 Name >

Custom Items

Enter name, day, period and location

(10 char, number, number and 4 char)

Item 26: Enter details for custom item 1 >

Item 27: Enter details for custom item 2 >

Clear Items

This provides a convenient way to clear individual cases. For example, there could be 1 day when a “daily item” Does not apply.

NOTE: The items will be replaced with blank spaces.

Enter SCHEDULE of items to clear

e.g. 3,4,6,2 means clear items on day3, period4
and day 6, period 2, etc

Enter SCHEDULE of Locations to clear

e.g. 3,4,6,2 means clear Rooms/locations on day3, period4
and day 6, period 2, etc

Color (Colour) Settings

Many of the items can be assigned a new color.

Some, such as subjects names, can be assigned individually, while others, such as period names or times, are assigned collectively.

There are 18 colors to choose from.

All colors displayed by default are included within the 18.

Clear Specific Entries

i.e. Overwrite specific entries with blanks

e.g. remove 1 lesson item or 1 location

Clear specific Names >

Clear specific Locations >
